EXAMINER'S COMMENT AND STATEMENT OF REASONS FOR ALLOWANCE

Claims 4, 41 and 84 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 113-116, directed to the species of Figures 10-11 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The following is an examiner's statement of reasons for allowance.

None of the prior art teaches, discloses or suggests an external fixation component including: a first capture member adapted to capture a first element of an orthopedic fixation system; a second capture member adapted to capture a second element of an orthopedic fixation system by snapping onto the second element from a direction generally perpendicular to the longitudinal axis of the second element, each of the first and the second capture members including a base and a head; a coupling between the first and second capture members that allows the first and the second capture members to rotate about three axes relative to each other; the coupling between the first and second capture members being further adapted to secure the first and second capture members from rotation with a single activation; a connector; a threaded aperture in the base of the first capture member; a first fastener having a threaded end adapted to mate with the threads of the aperture; a biasing member adjacent an end of the connector wherein the threaded end of the first fastener is

adjacent the biasing member; and threads on a second portion of the connector adapted to mate with threads on a second fastener.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
